Allowable Subject Matter

1. Claims 31, 35, 42-44, and 52-56 (to be renumbered 1-10 respectively) are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 31, 35, and 42-44, claim 31 teaches a data storage device comprising a plurality of adjacent data tracks, and first and second regions comprising subsets of adjacent data tracks, further comprising a guard band separating the first and second regions, wherein data are written to a first track of the first region and to a second track adjacent the first track, wherein the write transducer is moved in a first radial direction between the first and second tracks such that the data written to the first track is encroached only on one side by the data written to the second track wherein data are further written to a last track of the first region, wherein one or more intermediate tracks are interposed between the second track and the last track, and wherein the write member moves only in the first radial direction in traversing the intermediate tracks such that all data written to each intermediate track is encroached only on one side by data subsequently written to the respective adjacent track, which is neither taught or an obvious variation of the prior art.

Regarding claims 52-56, claim 52 teaches a data storage device comprising a plurality of adjacent data tracks, and first and second regions comprising subsets of adjacent data tracks, further comprising a guard band separating the first region and the second region, wherein data are written to a first track of the first region, and wherein the data are only encroached upon from a single radial side of the first track by subsequent data written to the first region, which is neither taught or an obvious variation of the prior art.
